Phone par install aur login

Pharmacy Hisab v2.0 | Roman Urdu | 15 October 2026

Yeh guide naye **live Firebase APK** ke liye hai. Login account tayyar hai; asal pharmacy ka store shuru mein khaali hai. Neeche ki entries sirf TEST naam se karein aur baad mein reversal se hata dein.

APK install karein

1. Chat se **Pharmacy-Hisab-v2-Firebase.apk** PC par save karein. Android **7.0 ya us se naya** phone chahiye. APK iPhone par install nahi hota.
2. USB data cable se phone connect karein. Phone unlock karke USB notification se **File transfer** chunein. APK ko phone ke Downloads folder mein copy karein.
3. Phone ke File Manager se APK kholein. Agar zarurat ho to isi File Manager ke liye **Install unknown apps** allow karein, phir Install / Update tap karein. Purani installation foran uninstall na karein; local drafts pehle check karein.
4. App kholein, internet on rakhein aur **mudakkirafridi@gmail.com** se login karein. Password wahi hai jo aap ne diya tha. Password is PDF ya app source mein save nahi kiya gaya.
5. Apna **6-digit PIN** banayein aur dobara confirm karein. Phone mein fingerprint enrolled ho to fingerprint option enable karke sensor par ungli rakhein.

Live data ka dhyan
Yeh APK seed/demo ke Rs 53,000 ya Rs 250,000 totals se shuru nahi hota. Yeh aap ke Firebase store ke asal records dikhata hai. Internet ke baghair pehla login nahi hoga.

Pehla acceptance check

Home, Registers, Reports aur More khulne chahiye. Home par net daily sale ka card aur supplier payable nazar aaye. **Gross sales, sale returns aur customer dues** ka purana workflow nazar nahi aana chahiye.

Install aur login: ☐ Pass ☐ Fail ☐ Abhi nahi

Phone: _____ **Android:** _____
Tester / date: _____

PIN aur fingerprint ka test

Password pehli dafa; baad mein device par local unlock.

Test	Kya karein	Expected nateeja
Dobara kholna	App close karke dobara kholein.	PIN / fingerprint lock aaye; email password dobara na maange.
Phone restart	Phone power off / restart karein. Phone ka apna lock khol kar app kholein.	App ka PIN ya fingerprint aaye; sahi unlock ke baad wahi records hon.
Ghalat PIN	5 dafa ghalat PIN daalein.	PIN ke liye taqreeban 60 second wait ho. Sahi PIN baad mein kaam kare.
Fingerprint cancel	Fingerprint prompt cancel karein.	Data unlock na ho; PIN se unlock ho sake.
PIN badalna	More > PIN / fingerprint settings mein current aur naya PIN dein.	Purana PIN fail ho aur naya PIN kaam kare.
Sign out	More se sign out karein.	Agli dafa email/password login maange; sirf fingerprint se signed-out account login na ho.

Fingerprint option nazar nahi aa raha?

Android Settings mein screen lock aur kam az kam aik fingerprint enrolled hona chahiye. Har phone fingerprint support nahi karta. System reboot ke baad pehle phone ka apna PIN lagwana Android ka aam behavior hai; app ka 6-digit PIN fallback hamesha rakhein.

PIN bhool gaye

Unlock screen par forgot PIN / password login wala option use karein. Firebase email/password se dobara tasdeeq ke baad naya app PIN set karein. Kisi doosre shakhs ka fingerprint isi phone mein enrolled ho to woh bhi Android biometric prompt se unlock kar sakta hai.

Security aur restart: ☐ Pass ☐ Fail ☐ Abhi nahi

Net sale, profiles aur owners

Naye simple workflow ko verify karein.

Sirf aik net daily sale amount

1. Add daily sales kholein. Amount ke liye **sirf aik textfield** ho. Cash / bank / customer credit / sale return ke alag amounts na hon.

2. Aaj ki poore din ki net sale **Rs 5,000** dein, review karke confirm karein. Home aur report mein sahi date par Rs 5,000 aaye.

3. Isi date ki doosri net sale submit karein. Duplicate entry reject honi chahiye. Ghalat sale pehle owner reversal se undo karein, phir durust sale dein.

Net sale aur cashbook
Net daily sale ek reporting total hai. Is entry se cash ya bank balance automatic nahi badalta; Abuzar ki sale breakdown is app mein dobara enter nahi hoti.

Profiles

4. Registers > Profiles kholein. Loan person, Staff, Zakat recipient, Supplier company aur Zakat company ki categories check karein.

5. Loan ke liye **TEST Loan Person**, staff ke liye **TEST Staff** aur zakat ke liye **TEST Recipient** add karein. Edit karke naam badlein; archive/remove karke active list se hatna check karein.

6. Purane customer add-entry bottomsheet mein credit sale, receive payment, customer return/refund, write-off ya opening customer balance ke options na hon.

Owners aur hissay

7. More > Owners mein teen owners ke naam edit karein. Shuru ke shares **40%, 40%, 20%** hon. Zarurat ke mutabiq owner add/remove karein.

8. Total 90% ya 110% karke save karein: reject ho. Total 100% karke save karein: accept ho aur app dobara kholne par wahi list ho.

Sale, profiles aur owners: ☐ Pass ☐ Fail ☐ Abhi nahi

Supplier, rent aur expense

Chhoti TEST amounts se balances milayein.

Supplier bill aur medicine return

1. TEST Supplier banayein. **Rs 10,000** ka bill add karein. Phir us bill ko allocate karke **Rs 2,000** pay karein: outstanding Rs 8,000 ho.

2. Isi bill ke liye confirmed supplier return **Rs 1,000** record karein. Outstanding **Rs 7,000** ho. Noncash return se cash dobara kam nahi hona chahiye.

3. Wahi submitted draft retry karne se payment double na ho. Agar advance dein to allow-advance select karein; baad mein bill ko apply karne par doosra cash outflow na ho.

Simple rent

4. Rent profile select karke **Rs 500** payment karein. Charge rent period aur Security deposit ke options na hon. Cash account select kiya ho to us ka balance Rs 500 kam ho.

Lunch, Dinner, Tea aur Other

5. Expense mein categories **Lunch, Dinner, Tea, Other** check karein. Tea Rs 100 add karein: cash Rs 100 kam ho.

6. Expense detail > **Edit expense** se Rs 150 karein. Kul cash effect Rs 150 ho, Rs 250 nahi. Purani entry aur reversal history maujood rahe.

7. Nayi expense detail > **Remove expense** karein aur reason dein. Us expense ka net cash effect zero ho. Record history mein rahe; balance wapas ho.

Zakat companies register

8. Registers > Zakat companies se company profile add karein aur chhoti payment record karein. Statement aur selected cash/bank mein wahi amount aaye.

Financial workflow: ☐ Pass ☐ Fail ☐ Abhi nahi

Sync, reports aur final checks

Live Firebase aur actual phone acceptance.

Do devices aur offline behavior

1. Doosre configured Android device par isi pharmacy account se login karein. Apna device PIN set karein. Pehle device par profile banayein, phir doosre par refresh karein: profile nazar aaye.
2. Internet band karke app dobara kholein. Pehle se authenticated device par PIN se cached records mil sakte hain. Financial submit ke liye internet chahiye; fail/pending entry ko review karke retry karein.
3. Internet on karke refresh karein aur retry karein. Aik hi entry do dafa post nahi honi chahiye. Kisi doosre device ki nayi entries refresh ke baad dikhni chahiye.

Email aur password Firebase se badalna

Firebase console > **pharmacy-hisab-20261015-v2 > Authentication > Users** mein wahi user edit karein. Email/password ke liye Firebase Authentication use karein; Firestore mein plaintext password na rakhein. App mein agla password login naye credentials se karein. Email badalne se usi user ki UID preserve rakhein, taake pharmacy membership barqarar rahe.

Reports aur close

Date aur person filters se supplier statement, net sale aur expenses milayein. CSV / PDF export phone par khol kar text aur totals check karein. Daily close **sirf din ke aakhir mein** test karein: is ke baad us date par nayi posting lock ho jati hai.

Masla report karna

Phone model, Android version, screen ka naam, steps, expected amount, actual amount aur error screenshot note karein. Password, PIN aur private financial details report mein na bhejein.

Free plan aur test ki had
Project par Blaze billing ya Cloud Functions enable nahi kiye gaye. Firestore free quota ke andar chalta hai; quota khatam hone par sync temporarily fail ho sakti hai. Automated Flutter aur Firestore emulator tests pass hain. Physical fingerprint aur reboot tests aap ke phone par abhi manually karne hain.

Official Firebase pricing: firebase.google.com/pricing

Final acceptance: ☐ Pass ☐ Fail ☐ Abhi nahi
